NGUYỄN THÀNH TRUNG

FULLSTACK DEVELOPER

ABOUT

- Short-term: I want to find a stable job and become a senior full-stack developer. I have been learned front-end for 3 years and basic about back-end, so now I want to experience about server and network, and apply my knowledge to reality. Besides, my purposes are experience about enterprise and how it work. My friends evaluate that I am engaging and funny at talking, however I hope I can develop my communication skill and connect to more people via my job. During the time at university, I joined management team of IT club and I realize management is one of the most important skill. With my enthusiasm, I desire to learn about management skill for the best serve to my job and my life.
- Long-term: I want to be a part of company with high skill, major to contribute for the development of the company. Build a diverse customer network, connect to more people, have solid relationship and credibility of superior, colleague are my important targets.
